SUMMARY

Fourth-year BS Information Systems student graduating June 2027, seeking a web development internship or OJT placement. I build sites end to end — responsive front ends in HTML, CSS and JavaScript, and the PHP and MySQL behind them. Most recently a school management system with three role-based portals, a grade approval workflow and an analytics dashboard, on a MySQL schema I designed myself.

EDUCATION

Bachelor of Science in Information Systems

Expected June 2027

Kolehiyo ng Lungsod ng Dasmariñas — Dasmariñas, Cavite

- Relevant coursework: Web Systems & Technologies · Information Management · Systems Analysis & Design · Data Structures & Algorithms · Object-Oriented Programming · Quantitative Methods

TECHNICAL SKILLS

Frontend	HTML5, CSS3, JavaScript (ES6+), responsive design, Flexbox & Grid, DOM manipulation
Backend & data	PHP, session-based authentication, CRUD; MySQL, SQL, schema design, phpMyAdmin
Analysis & tools	Python (pandas, matplotlib), data cleaning; Git, GitHub, VS Code, XAMPP, Netlify

PROJECTS

Dasmariñas North NHS — Website & School Portal

January 2026 – October 2026

Full-stack — HTML, CSS, JavaScript, PHP, MySQL · dnnhs-portal.free.nf

- Built three role-based portals — student, teacher and administrator — behind a single PHP session login, each with its own permissions, dashboard, text-size control and dark mode.
- Implemented a grade approval workflow moving marks from teacher submission through adviser review to publication, tracking the state of every class across 100 classes.
- Designed the MySQL schema for multi-year records, with archiving, activity logs and a one-click `.sql` export for backups.
- Built an analytics dashboard reporting school-wide averages, passing rate, grade distribution and per-subject and per-section rankings for 340 learners and 50 teachers.
- Implemented DepEd grading rules — per-term grades, the 75 passing line, honours thresholds and the Observed Values behaviour rubric.

GWA Calculator & Honours Tracker

2026

Solo — HTML, CSS, vanilla JavaScript (no libraries)

- Built a browser tool computing general averages under DepEd rounding rules, reporting honours standing against every criterion, and persisting to `localStorage`.
- Implemented a reverse planner giving the minimum grade needed across all remaining grading periods to reach a target average.
- Solved it by exhaustive search rather than algebra — finals round before averaging, making the result a step function that closed-form solutions get wrong at the boundaries. Verified against 400 randomly generated grade sets.

ACTIVITIES & OTHER

- freeCodeCamp certifications: Responsive Web Design · JavaScript Algorithms and Data Structures — 2026
- Languages: Filipino (native) · English (professional working proficiency)
